Darek Mihocka, proprietor of emulators.com, and whom I linked to [a few years ago](#), [released the source code to Atari ST emulator Gemulator 9.0](#), and in celebration, he also posted his 1992 promotional video to YouTube: [Part 1](#), [Part 2](#), [Part 3](#). Warning: It's a really bad video. The music, the hair, the cheesy video effects, the bad acting, oh did I mention the hair? But it's also a trip in the wayback machine.

Pre-emptive snarky comment: “You idiot, you got the quote wrong. It’s ‘[My eyes! The goggles do nothing!](#)’”
